PROFESSIONAL SUMMARY

Computer Engineering graduate specializing in backend systems, cloud infrastructure, and applied AI. Experienced in building REST APIs with Flask, deploying self-healing cloud infrastructure on AWS, and integrating machine learning into production workflows. Seeking fresher roles in software development, cloud engineering, or data/AI.

EDUCATION

Bachelor of Engineering in Computer Engineering Nov 2022 – Jul 2026

Lokmanya Tilak College of Engineering

Higher Secondary Certificate (Class XII) 2021

Maharashtra State Board, 80.33%

Secondary School Certificate (Class X) 2019

Maharashtra State Board, 74.20%

SKILLS

Programming: Python, SQL

Backend Development: Flask, REST APIs, JWT Authentication, SQLAlchemy

Databases: PostgreSQL, MySQL

Artificial Intelligence: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, Prompt Engineering, AI Agents

Data & Analytics: Pandas, NumPy, Data Analysis, Data Visualization, Power BI

Cloud & DevOps: AWS (EC2, Lambda, CloudWatch), Docker, Cloud Computing

Tools: Git, GitHub, Linux, VS Code, Jupyter Notebook

Professional Skills: Problem Solving, Communication, Team Collaboration, Leadership, Project Management

EXPERIENCE

AI Strategy & Business Intelligence Internship – IBM 2025

Intern

- Completed a 6-week IBM SkillsBuild program covering AI strategy, business intelligence frameworks, and enterprise AI adoption.
- Studied AI agent design, automation workflows, and data-driven decision-making approaches.

Cyber Smart AI Prime Internship – CISCO 2025

Intern

- Completed a certification program covering cybersecurity fundamentals, networking concepts, and secure infrastructure practices.
- Learned AI-assisted cyber defense approaches and security best practices.

Google Developer Groups (LTCOE Campus)

Oct 2025 – May 2026

Core Member

- Organized technical workshops, community initiatives, and developer-focused events.
- Collaborated with teams to execute technical programs and increase student engagement.

PROJECTS

Classroom Management System

- Built a full-stack platform where teachers post announcements and allocate assignments, and students submit work for review, using a Flask REST API backend and React frontend.
- Implemented JWT-based authentication with role-based access control for teacher and student workflows.
- Containerized the application with Docker for consistent local development and deployment.

AegisCloud – AI Self-Healing Cloud Infrastructure

- Built a machine learning model to detect anomalies in cloud infrastructure metrics and deployed it on AWS Lambda for automated inference.
- Integrated AWS CloudWatch monitoring to trigger automated recovery workflows on failure detection.
- Reduced manual intervention for infrastructure issues through event-driven, serverless automation.

CERTIFICATIONS

AWS Certified Cloud Practitioner – AWS

- Validated cloud computing, security, pricing, and AWS core services knowledge.

AI Agent Architect – IBM

- Designed intelligent AI agents, automation workflows, and decision-making systems.

Data Analysis with Python – IBM

- Applied data cleaning, visualization, and analytical techniques using Python.

AWS re/Start Graduate Certification

- Learned cloud infrastructure, deployment, and scalable architecture fundamentals.

Python Programming Training

- Strengthened programming fundamentals, algorithms, and problem-solving skills.

ACTIVITIES

Workshop Organizer – IIT Madras TechFest

- Managed workshops with 200+ participants and coordinated technical sessions.
